The following is an examiner's statement of reasons for allowance: There is no suggestion to modify the buckle of Haupt (US 6694644) beyond that suggested by Miotto (EP 572373) so that the axles on the two sides of the releasing plate further respectively have a resilient plate extending backwardly with the resilient plate supported against a surface of the supporting block as this provides a biasing action by a particular simplified structure not suggested in the art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
